

GreenOffice

UNPLUG chargers, fans or any items not regularly used as the use energy even when turned off but are still plugged in

GreenHome

ILLUMINATE driveways and walkways only when necessary by using timers or bulbs featuring motion or light sensors. Use a smart hub to control the lighting schedule.

SWITCH to LED bulbs. They have come down in price significantly over the years and requires up to 80% less than regular incandescent bulbs and 30% less than CFL's.

Did you Know???

A crack as small as 1/16th of an inch around a window frame can let in as much cold air as leaving the window open three inches,

Every year, more than \$13 billion worth of energy leak from houses through small holes and cracks. That's more than \$150 PER FAMILY!

Every ton of paper recycled saves enough energy to heat and cool the average American home for at least 6 months.
